ETHAN FAIRWEATHER

Web Developer

(205) 587-0515 | **ebfairweather@gmail.com** | **github.com/inunotaisho26** | **https://www.ebseiten.com**

OBJECTIVE

To obtain an entry level developer position and continue to gain proficiency with software development and project management.

Betamore | Fall 2016

Intro to Full Stack Web Development

- Building multiple web applications using JavaScript, node.js, Postgres, Redis, AngularJs, ExpressJs

Banc Statements, Inc | December 2012 - Present

Operations and Marketing Software

- Worked on improvement, set-up and structure of CRM software
- Software used by sales associates to increase efficacy of calls, create documents important to the sales cycle and improve market mailing campaigns

Laser Printing Operations

- Operated and conducted minor maintenance on various machinery
- Custom built and installed several computers across several operational departments

PROJECTS

BorderlandoftheRockies.com

Commissioned by a relative to promote his camper trailer sales + Built on framework called Platypi which uses ExpressJs, LESS, Typescript and Heroku.

Sign 2 Speech

Created a device using NodeJS that is designed to read sign language and translate it into spoken English. We used a Raspberry Pi 3, Leap Motion and 3D printed clips. Potential employers may request a demonstration of the Alpha phase design.
